PRIZE

Top performers get hired with a paid contract and the opportunity to work on real-world projects.

QUEST BRIEF

We are **Tactful**, a scale-up building and operating a **cloud-native Customer Engagement Platform** that helps businesses manage customer communications across all digital channels. We enable teams to deliver fast, consistent, and high-quality customer experiences through a unified omnichannel layer and modern tooling. (Tactful AI)

Start Date: Immediate

Location: Sheraton, Cairo (Hybrid)

Salary: 400 – 650 GBP

Type: Full-time · Individual Contributor

How the Hiring Quest Works

- Register for the quest
- You'll receive full challenge instructions by email
- Submit your solution before the deadline
- Top candidates will be invited to a technical review session
- One candidate will be hired — others may be considered for future roles

---

Who We're Looking For

1. 3–5 years of experience in **Application Security** or related software security roles
2. Strong software development background
3. Hands-on experience with **cloud infrastructure & systems** (Kubernetes, Docker, AWS)
4. Solid experience across **backend & frontend stacks** (Node.js, Python, React, Vue)
5. Proven track record in **penetration testing, AppSec, or security reviews**
6. Comfortable threat-modeling complex, multi-tenant SaaS systems
7. Clear communicator who can explain risks, tradeoffs, and mitigations

---

Your Mission

You will complete an **Application Security Validation Challenge** focused on a realistic, cloud-native SaaS platform.

Your task is to demonstrate your ability to:

1. Threat model a **multi-tenant SaaS system**
2. Identify and prioritize security risks aligned with **OWASP Top 10**
3. Propose **shift-left** security mitigations
4. Simulate real application-level exploits
5. Clearly communicate security reasoning and decisions

All challenge details, scope, and constraints are defined in this document:

What You Should Submit

Submissions must follow the **Deliverables section exactly** as defined in the challenge document

---

Evaluation Criteria

Evaluation Criteria

Application & Cloud Threat Modeling — **25%**

Risk Identification & Prioritization — **25%**

Mitigation Quality & Practicality — **20%**

Pentest Simulation & Fixes — **20%**

Clarity, Structure & Communication — **10%**

After Submission

Top candidates will be invited to a **technical review session** with the engineering team.

Final hiring decision within 3–5 business days after the review session.
